

Arduino Lab 9 Proposal

Abdelrahman Wael.20010869

Ahmed Hesham.20010234

Morse code:

Morse code was **critical** for communication during World War II. It was also used as an international standard for communication at sea until 1999. Still can be used to send **encrypted messages**.

Tools:

- | | |
|--|--|
| <ul style="list-style-type: none">• Bread Board• Arduino Uno• Electric Wires | <ul style="list-style-type: none">• LED• Buzzer• Push Button |
|--|--|

Usage:

The user inserts any message he wants to encrypt and uses the **push button** to start the display of the code by LED and Buzzer.

Connection:
