HCI Assignment

Name: Mohamed Ibrahim Mohamed Wahab Allah
ID: 19016267

Give 5 reasons for using virtual environments with examples on that:

● It can be used in education as more interactive experience than normal education as you can exploring the and interact with the subjects which gives you more worthy experience.

● a model of an environment will teach or train as well as the real thing in engineering.

● information visualization, manipulating and rearranging information, using graphic symbols, so it can be more easily understood in presentations and discussions.

● It can be used in displaying historical stories as if you are participating in it.

● needed to give the disabled the opportunity to do experiments, and activities that they cannot do otherwise.
